

Rene Jr. Labayen

Mechanical Engineering | Python | Webpage Programming | Business Management

Bacolod City, Negros, Philippines | +639682930326 | labayenrene@gmail.com

Github: github.com/Areljay

Summary

Mechanical Engineer with a background in programming and a diploma in Business management. Hands-on experience on web page projects developing interactive web-based tools applying engineering principles. Designed warehouse layouts and racking system for optimal material flow.

Skills:

- Basic Python, HTML, CSS, Javascript
- AutoCAD and technical drawings
- Microsoft Word and Excel
- C1 English Language proficiency
- Warehousing/Logistics

Education:

Business Management

- * Canadian College of Technology and Business
- * 2023 - 2025

Bachelor of Science in Mechanical Engineering

- * Colegio San Agustin - Bacolod
- * 2013 - 2016

Electromechanical Technology

- * Technological University of the Philippines - Visayas
- * 2010 - 2013

Short courses (online)

- *Python basics/data structure
- *Introduction to HTML5 by University of Michigan
- *Project Management by Google

Projects:

<https://areljay.github.io/1/engineering.html>

- Developed an interactive web application that computes estimated electricity cost and converts unit for weight and length.
- Implemented calculations using appliance power rating, usage duration, and electricity rate.

<https://areljay.github.io/1/bvp/bestvaluepicker.html>

- Developed an interactive web tool that calculates and compares item prices based on price per unit quantity to determine the best-value option.
- Implemented automated calculations to compare products with different package sizes and prices.

<https://areljay.github.io/1/index.html>

- Created a simple web page to practice Web developing

Professional Experience:

Stone Countertop Fabricator/Installer

Hardrock Granite Countertops

March 2025 - July 2026

Salmon arm, BC, Canada

- Cutting, grinding and polishing stone slabs to produce countertops
- Measuring and Reading technical drawings
- Helping with the installation at residential or commercial job site

Kitchen/Cook

Multiple restaurants (*Boston Pizza, Jollibee, etc*)

January 2023 - August 2025

BC, Canada

Plant Auxiliary Operator

North Negros Biopower Inc.

January - December 2022

Negros Occidental, Philippines

- Maintaining the desired fuel and load, and other plant operations
- Field activities on Boiler, Turbine, air compressor and pipelines
- Maintenance when shutdown

Warehouse Staff / Layout Designer

Vallacar Transit Inc.

June 2018 - December 2021

Negros Occidental, Philippines

- Process overseas purchase orders and item transfer to other warehouses.
- Design warehouse layout and racking system using AutoCAD for optimal material flow and warehouse management system

Design Technician Trainee

Tsuneishi Technical Services Philippines

January - September 2013

Cebu, Philippines

- Technical drawings using AutoCad
- Checking of actual construction of ships in shipyard and making report
